DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Michael Makush on 7/14/10.

The application has been amended as follows:

Cancel Claims 7 and 15.

Claim 1:

Lines 7 and 10, delete "or before"

Claim 3: line 3, after "thereof" delete "during the periods from the second time point to the fourth time point"

Claim 4: line 4, delete "the periods from the first time point to the fourth time point" and insert --feeding of the inactive gas--

Claim 10:

line 7, delete "or before"

line 10, delete "or before"

between lines 20-21 and before "feeding" in line 21, insert the following paragraph:

--feeding the rinse liquid onto the surface of the target substrate during a period from the second time point to a third time point within the predetermined period, while

moving the liquid feed point radially outward from the intermediate position to a periphery of the target substrate, --

Line 28, delete "from or"

Line 28, delete "with a higher rotational speed than in the periods from the first time point to the fourth time point" and insert --with a higher rotational speed than a rotational speed of the target substrate at a time of feeding the inactive gas--

Claim 11: line 3, after "thereof" delete "during the periods from the second time point to the fourth time point"

Claim 12: line 5, delete "the periods from the first time point to the fourth time point" and insert --feeding of the inactive gas--

Claim 23: lines 8 and 11, delete "or before"

Claim 24:

lines 9 and 12, delete "or before"

line 34, delete "from or"

line 35, delete "higher rotational speed than in the periods from the first time point to the fourth time point" and insert --higher rotational speed than a rotational speed of the target substrate at a time of feeding the inactive gas--

Claims 25-26, line 2, delete "during the period from the second time point to the third time point"

2. The following is an examiner's statement of reasons for allowance: The prior art fails to teach or suggest the claimed limitations. Specifically, the prior art fails to teach moving the rinse liquid and inactive gas to various points on the target substrate, such that the rinse liquid is moved from the center radially outward towards the periphery as the inactive gas is moved 10-50 mm distant from the center, towards the center and

then towards the periphery of the target substrate, wherein the gas feed point is located radially inwards of the rinse liquid feed point during the period from the second time point to the third time point. In several interviews with Mr. Michael Makush the week of July 12th, 2010, the examiner suggested amending the claims to correct 112, second paragraph issues.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sharidan Carrillo whose telephone number is 571-272-1297. The examiner can normally be reached on M-W, F 6:30-5:00pm, alternating Thursday.
